

Free Water Presentations for

**School
Classrooms**

&

**Community Service
Organizations**

Two presentations to choose from

Water Quality Presentations

During this hands-on presentation:

- Each person can participate in learning how our rivers, creeks, lagoons, and beaches get polluted
- Different pollutants are sprinkled on the watershed model
- After it rains (with spray bottles) people visually see how the pollution is carried into the waterways
- You will learn about different tips and resources on how you can protect water quality

For more information and to schedule contact Cynthia Mallett at 760-435-5807 or email cmallett@ci.oceanside.ca.us. For more information on how you can protect water quality click on www.OceansideCleanWaterProgram.org.

Water Conservation Presentations

During this presentation you will learn:

- Water history and how much water on earth is drinkable
- The sources of Oceanside's drinking water
- Tips on how to use water wisely
- Resources to help you conserve water

For more information and to schedule contact Nancy Romero at 760- 435-5828 or email nromero@ci.oceanside.ca.us. For more information on how you can conserve water click on www.SaveWaterOceanside.com.

All presentations

- Are geared for all grade levels as well as adults
- Can be adjusted for length of time (30-60 minutes)
- Address California State Science Standards
- Are conducted by professional City staff

Urban Runoff Hotline

760-435-5800

Report anything other than rain entering the storm drain.

Report Water Waste

760-435-5865
