

IMPORTANT NOTICE

City of Oceanside
Financial Services Department

Oceanside City Code requires that any business have an approved business license prior to opening for business. Submitting an application for a business license and paying the fee does not constitute a business license approval.

The approval process takes approximately fifteen (15) days after submittal of a completed application. If your business requires Fire Department inspection, special City approval such as a Conditional Use Permit or Development Plan, or if your business is proposed for public property and is subject to lease consideration, this process could be longer.

You may want to defer signing a lease agreement, or purchasing a business site until you have checked with the Planning Department about the proper zoning of your proposed property.

URBAN RUNOFF INFORMATION

City of Oceanside
Water Utilities Department

The City of Oceanside is required, under new state regulations, to identify the potential effect that each business may have on water quality. All businesses are also required to comply with the City of Oceanside's Urban Runoff Management and Discharge Control Regulations (City Code Chapter 40), which prohibit the discharge of pollutants and non-storm water to City streets and storm drains. Water that flows on streets and into storm drains discharged to the nearest water body, without treatment. Typical urban runoff pollutants include oils, chemicals, building materials, dirt, vegetative waste, and trash. All businesses must complete and submit this form with their business license application, as well as implement the appropriate Best Management Practices to prevent such discharges. This form must be completed to receive your business license. Contact the Water Utilities Department at 760-435-5800 or log on to our website at www.oceansidecleanwaterprogram.org for further information.

Business License Guide

A successful fire inspection is required in order to approve and finalize your Business License. The fee for this inspection is \$152.00. You will pay this fee along with your Business License fees.

We will need to view your place of business when you have everything in place and you are ready to begin business in your facility (all tenant improvements completed, office equipment and furniture installed, stock placed on shelving/racks, etc.)

Please call for your Fire Inspection when your facility is completely ready to serve customers. Contact us at 760-435-4101.
We can typically schedule your inspection within 24-48 hours from the time you call.

We are providing the following basic guidelines to assist you in the preparation of your place of business. There may be additional requirements based on the type of business and materials being stored or sold.

1. ACCESS

- ☐ Fire lanes are unobstructed and clearly marked.
- ☐ Address numbers of the building are in a contrasting color and clearly visible from the street. Commercial buildings require numbers 6 inches in height and industrial buildings require numbers 12 inches.

2. EXITING

- ☐ Exit pathways, exit doors and stairways are clear and unobstructed.
- ☐ Exit door(s) open easily without special knowledge of locks or bolts.

3. GENERAL FIRE SAFETY

- ☐ Storage is kept at least 18 inches below sprinkler heads or 24 inches below ceiling.
- ☐ Combustible materials are kept at least 3 feet away from heat producing equipment.
- ☐ Trash dumpster is at least 5 feet away from any building overhang or opening.
- ☐ Flammable or combustible liquids are kept in original containers; U.L. approved safety cans or approved storage cabinets.

4. FIRE EXTINGUISHERS

- ☐ A portable extinguisher with a minimum rating of at least 2A:10BC must be available within 75 feet of travel from all portions of the interior of the building.
- ☐ The date punched on the service card of extinguishers from a reputable Fire Extinguisher Company within 12 months.

5. ELECTRICAL

- ☐ Extension cords are not being used in place of permanent wiring.
- ☐ Electrical cords are in good condition and are not subject to damage by being placed under carpet, under doors, through walls or ceilings or stapled in place.
- ☐ Cover plates are on all outlets and light switches. Circuit-breaker panels are labeled and have blanks in place of missing breakers.

6. GENERAL INFORMATION

- ☐ If you are making modifications to the building (putting in a hood system, paint booth, adding a wall, etc.) contact the Building Department at 760-435-3950 and the Fire Department 760 435 4101 to see if a permit is required.
- ☐ If you have an outside storage area, contact Code Enforcement at 760-435-3944.
- ☐ If you are handling, storing or disposing of hazardous materials such as waste oil, antifreeze, etc., you must submit a MSDS sheet to Fire Prevention and provide quantities for each chemical prior to your business license inspection.
- ☐ If your business emits a contaminant into the air, follow the Air Pollution and Control District (APCD) guidelines. 858-650-4700.
- ☐ If your building is sprinklered, the system must have a quarterly and annual inspection and a current five-year certification by a C-16 contractor. The sprinkler system must be monitored. Check with your landlord/property manager with questions.
- ☐ If you are a restaurant or food service provider, your hood suppression system must meet UL300 compliance. You can check with a licensed C-16 Hood System Contractor for verification. You must also have a "K" rated fire extinguisher within 30 feet of the kitchen.
- ☐ If you are operating a body shop, and installing a booth pull the appropriate permits with the Building Department (760-435-3950) and APCD (858-650-4700). Be prepared to conduct a test with a C-16 contractor and fire inspector to confirm that the spray booth and extinguishing system is operating properly.
- ☐ Please have a Knox box (a key box which only the fire department has access to) installed by the main entrance to your building or at each end of the multi-tenant strip mall to facilitate Fire Department access. Contact Fire Prevention at 760-435-4101 for more information.
- ☐ If you are operating a family daycare or residential care facility, please call Fire Prevention at 760-435-4101 if you have questions.

Please complete the following, a portion of which will be stored by the Oceanside Police Department for use in case of emergency. This information should be updated as often as needed by contacting OPD dispatch, 760-435-4900 (24/7).
