BACKGROUND

On July 12, 2006, the City Council approved a construction contract with West Valley Construction Co., Inc. of Campbell in the amount of \$266,029.20 for construction of the Stewart Street Waterline Replacement project.

The existing 12-inch cast iron waterline was located in Stewart Street between Laguna Street and California Street (Exhibit A). This line was approximately 50 years old and extremely fatigued as evidenced by recent leaks. Approximately 950 linear feet of line in Stewart Street was replaced from the Laguna Street knuckle to approximately 30 feet north of the California Street intersection. Hirsch & Company of San Diego designed the Stewart Street Water Line Replacement project.

The project consisted of installing approximately 950 linear feet of 12-inch polyvinyl chloride (PVC) C-900, domestic waterline. The work generally included, but was not limited to, furnishing labor, equipment, materials, and services to construct the 12-inch waterline, water services, fire hydrants, and appurtenances.

ANALYSIS

The project has been completed and there are no change orders.
