Incident Status

The Oceanside River Fire remains confined to the riverbed with no evacuations or imminent threat to structures in Oceanside. The fire has burned 100 acres and is estimated to be contained by late afternoon.

What Citizens Need To Know

Residents should continue to shelter in place unless told to evacuate and continue to remain off the roads to keep access clear for emergency vehicles. Residents should call 9-1-1 only in the case of an emergency and if fire is spotted outside of the Oceanside Fire riverbed perimeter. Residents should be extra vigilant and cautious with concern to fire and public safety while emergency resources are deployed throughout the County.
