

What's new at the Harbor?

On July 1, 2015, passengers boarded the newly launched Oceanside Adventures, a state of the art 50-foot catamaran in Oceanside Harbor, on its maiden voyage and first whale and marine life excursion. The two-hour trips will explore the Southern California coastline on what will be a daily, year-round operation. The catamaran will be docked and ready for excursions daily waterside at the historic Harbor Lighthouse.

The warm waters in the region flourish with sea life including whales, dolphin, harbor seals and California sea lions all year long. Visit www.OceansideWhalewatching.com for booking information and a daily log of marine life sightings.

Harbor staff constructed and employed a float in an effort to attract seals away from the docks where they were making it difficult for boaters to access their boats. Constructed with a combination of floatation that was donated and of leftover material, the float will hopefully become a refuge for the seals.
