

GREEN OCEANSIDE

The [Green Oceanside Campaign](#) is the City's environmental services and programs including [zero waste](#), [water efficiency](#), and [watershed protection](#). These programs offer opportunities for residents, businesses and visitors to participate in programs and services that protect and enhance Oceanside's natural resources.

Water Efficiency

What are you thankful for? Though the holiday season may look different this year, we can all be thankful for clean, safe, and reliable water delivered to our homes. Oceanside's water grows your squash, cleans your dishes, sanitizes your table, and even thaws your turkey! To have a wonderful, water-wise winter, follow Green Oceanside's water conservation tip of the month: adjust your irrigation controller to reduce your water use during the cooler, wetter months. You can do this by switching your automatic system to the "rain" mode, or close your shut-off valve if you have a manual system. THANK YOU for continuing to conserve our most precious resource!

Zero Waste

Give thanks and support local veterans by participating in the bi-annual [Donation Weeks](#). Between November 2nd and November 13th, Oceanside residents may schedule a curbside donation pick up of up to eight (8) gently used items such as furniture, appliances, bags of textiles, sporting equipment, toys, electronics, and more!

All donated items will be transported to the Oceanside Disabled American Veterans Charity, to support our local veterans. Schedule your curbside donation pick up today by calling Waste Management's Customer Service Line at 760-439-2824 at least 24 hours before your normal solid waste and recycling service day.

Watershed Protection

We are entering the rainy season for Oceanside! Do your part and help to prevent stormwater pollution by following these steps at home. The environment thanks you for your efforts to make sure ONLY rain enters our storm drains.

ARE YOU RAIN READY?

HELP PREVENT STORMWATER POLLUTION

- Pet waste picked up from yard ✓
- Trash and recycling bins closed ✓
- Rain and roof gutters cleaned ✓
- 5 days of no pesticide or fertilizer use ✓
- Rain barrels out ✓
- Sprinklers off ✓
