

KOCT Invents Time Machine

This year the City of Oceanside is celebrating its 125th Anniversary. KOCT- Your Oceanside Channels has developed a new technology for the commemoration. KOCT is pleased to announce the invention of a Time Machine—simply click [HERE](#) to be transported back in time!

KOCT's time machine, or VOD (video on demand), has over 67 programs in the History Story category—and they are adding more every week. Go to koct.org, click Video On Demand, and then History Stories, and you'll be able to watch programs like The History of Oceanside, Iraq through the Lens of Photojournalist Hayne Palomour, Pirate Treasure 1965, Mission San Luis Rey- Long Live the King, as well as documentaries about the Oceanside Pier, Civic Center, Oceanside Museum of Art, and the restoration of the Americanization School building.

KOCT is also airing these programs on KOCT's channel 18 & 19. KOCT is available in Oceanside on Cox Cable and county-wide on AT&T's U-Verse channel 99. All of KOCT's programs can be obtained on DVD for a small dubbing fee.

Check out the new Time Machine, learn about your community and consider becoming a Friend of KOCT: <http://koct.org/support#becomeafriend>.

For the first time in 100 years, Oceanside has no local daily paper—it is more important than ever to support independent local media like KOCT.
