

Appendix C

- Small Group Discussion – summary reports

City of Oceanside Local Coastal Program Update- Workshop #1

November 8, 2018
5:30pm-7:30pm

City Council Chambers
300 North Coast Highway

Small-Group Discussions

STEP 1: CHOOSE YOUR REPRESENTATIVE

Choose a representative to record your group's input during the "Brainstorm" exercise and to report back to the room in step 3.

STEP 2: BRAINSTORM

Discuss the following questions and use the flip chart to document your group's responses:

1. What are the resources or qualities that define Oceanside's coastal zone?
 - Public access
 - Recreation
 - Lodging
 - Housing
 - Commercial operations
 - Open space and natural habitat
 - Harbor amenities
 - Infrastructure
 - Visual character

2. In light of the findings of the vulnerability assessment, what coastal resources should the City prioritize in its adaptation planning efforts?

3. What additional information is needed to guide future discussion of specific adaptation strategies?

STEP 3: SUMMARY

Representatives from each of the small groups will be asked to present a summary of the input provided during their group's brainstorm. This information will be recorded at the front of the room.

STEP 4: PRIORITIZE

Each individual participant will receive a set of three dot stickers. After the large group summary, each individual participant will be asked to identify their top three Oceanside coastal resources/qualities by placing a dot sticker on the summary sheets at the front of the room.

BUILD JETTYS TO
RETAIN SAND FROM EROSION

ASSETS

PRIVATE PROPERTY

- PIER -

- PUBLIC PROPERTY -

- Infrastructure -

- Parks -

- Harbor -

1. Pier and band shell
2. Harbor
3. Beaches
4. Public Safety
5. Home Protection
6. Protection of the roads
7. Protection of utilities

1. Resources/Qualities

(?) II Beach - recreation/spots
visitors

I Ocean - Surf
Fish
Swim
Sail

Riverine Environments/Lagoon

- Bicycling
- Bird watching
- water quality
- Fishing(?)

II Harbor - all of the above
Boat docks w/lineboards

Hotels
Condos

I Pier - visual character
signage

3. Accurate Predictions

- Reduce GHG vs building seawalls
- Policy Decision - Managed Retreat
- Study effect of Harbor on Beach erosion.
- How long something will last vs impacts
- Analyze pollution caused by homes falling in to Ocean
- Complete cost of protecting homes on the Beach vs Tax revenue

* Beach-related
Living/work } protects

* Harbor + Beach priorities

Study the harbor → beach erosion

Public Safety

* Homes / private property

* Roads + utilities / infrastructure

Policy discussion - managed retreat

* Pier
